# BookRUs

Introductions

Hrithik Ramganesh
Frontend
- Technical Writing
- Styling

**William Eng**
Backend
- API
- Unit tests

Elliot Sims
Frontend
- UI Design
- Searching & Sorting
- Data Visualizations

Matthew Escobar
Backend
- AWS
- Database

Demonstration

Self Critique

Self Critique Pt. 1

What did we do well?

- Keep each other accountable
- Delegate tasks
- Hit our goals

What did we learn?

- Communication
- A lot of tools!
  - Flask
  - React
  - AWS
  - ...

What did we teach each other?

- Teamwork
- Also more tools!
  - Javascript
  - Docker
- Unit tests
- Patience

Self Critique Pt. 2

What can we do better?

- Time management
- Workload balance
- Consistency
- Code styling and documentation

What effect did the peer reviews have?

- Microscopic to macroscopic focus—refocus on serving clients
- Outside insight

What puzzles us?

- Deeper details of:
  - Javascript
  - AWS
  - SQLAlchemy
  - Docker

Other Critique

Other Critique Pt. 1

What did they do well?

- They came up with and implemented a helpful and socially engaging idea!
- Style
- Plenty of sortable/filterable options

How effective was their RESTful API?

- There was a long downtime but overall useful
- Plenty of filters/sorts
- Teeming with sources, especially news

How well did they implement our user stories?

- Good Quality of Life changes
- Started with fundamentals before considering big changes

Other Critique Pt. 2

What did we learn from their website?

- Info for immigrants
  - Country stats
  - Demographics
  - Recent news
  - Charities

What can do they do better?

- Data readability
  - Homicide rate and education rate don't include units
- More user stories
  - Fellow Immigrants!
  - Groups

What puzzles us about their website?

- Data units unclear (homicide rate, education rate)
